## PROJECTS

### MEDIKIT- OPDs Booking Portal for Hospitals

Medikit is a comprehensive healthcare management system designed to simplify various medical-related tasks for users. With Medikit, users can easily book doctor appointments, call ambulances, check bed availability in hospitals, and track their medicine usage.

- Book Doctor Appointments
- Call Ambulance facility
- Check Bed Availability
- Track Medicine Usage

### Mr Robot Themed Personal Portfolio

Developed an innovative personal portfolio website featuring a Linux-like Command Line Interface (CLI) inspired by the Mr. Robot theme. The website allows users to navigate through different sections by typing commands, creating a unique and engaging user experience.

- Responsive Design
- Interactive Elements
- Personal Branding
- Linux like CLI

### FullStack E-commerce Website

Designed and developed a fully functional e-commerce website named CARA, allowing users to browse and purchase products online. The website features a modern, user-friendly interface with an emphasis on seamless navigation and efficient product management.

- Product Catalog
- Responsive Design
- Modern UI/UX
- Shopping Cart

## Educational Background

### Bachelor of Technology in Computer Science, Specialization in Cybersecurity

Darbhanga College of Engineering
Aug 2023 - Aug 2027

### High Schooling

CM.Science College, Darbhanga
April 2022

## Skills

### Technical Skills

- HTML
- CSS
- JavaScript
- React
- Node.js
- Firebase
- Python

### Cybersecurity Skills

- Linux
- CTFs Challenges
- Network Security
- Penetration Testing Basics

### TOOLS

- Git and Github
- Kali/Parrot/Arch Linux
- VSCode

### Certification/Short Courses

- Ethical Hacking Bootcamp, IIT Patna
- Responsive Web design
- Introduction to CyberSecurity by Cisco
- TryHackMe Badges and Profile
- JS Algorithm and DSA
- Udemy Python
